

CONNECTING TO SEWER

- 1) Tap fees are paid to the Township office. The cost is \$3,500.00 and is payable to Oxford Township. This only pays for permission to tie into the sewer system and does not include any labor or running of lines from the main.
- 2) The homeowner will need to hire an excavator to run the line from the street to the home. The excavator will need to purchase a sewer permit from the Township office *before* any work is done. This costs \$50.00 for the Township permit fee, plus \$125.00 for the County's portion of the permit fee, plus \$5.00 for inspection mileage = \$180.00
- 3) Once there is an active sewer permit and the work is done, we require an inspection by the Township Plumbing Inspector. He is available Tuesdays and Thursdays between 8:00 AM and 1:00 PM. You must call by 3:00 PM the day before in order to schedule the inspection.
